PRODUCTS

NEW LINE UP

New products developed by NIKKO

Small PP Screw Cap Bottle

Release of long-awaited small containers

New small PP container up to 10~125 mL.
Liquid leakage prevention by inner seal.
Autoclavable.

Posted on
page 13

ECO Plastic Biomass N Bottle

CO₂ Reduction

It is a carbon neutral ecological product.

Posted on
page 8

Fluorine Gas Coating Container

Can be used with organic solvents
that could not be used.

New addition of 50 mL
2 series: Standard and Shading.
PP beaker was standardized.

Posted on
page 9

Wide Mouth Standard Bottle NEW Line-up ① (160 mL)

The 160 mL capacity of the
glass bottle was added to the
standard product.

2 series: Standard and Shading.

Posted on
page 18

Wide Mouth Standard Bottle NEW Lineup ② (10 L)

Added 10 L with lower total height.

Good stability, ideal for storage.

Posted on
page 18

PP Disposable Beaker 20 mL

Ideal as a small disposable cup
Proven as a measuring cup.

Posted on
page 35

CONTAINER

Contents & Guide

Catalog Information

Containers

Our basic technologies of plastic blow molding and injection molding are used to create containers of all shapes using a wide range of materials, from high-performance resins to general-purpose resins, that meets a wide range of market needs.

Instruments

We provide laboratory instruments that can meet a wide range of needs of factories and research institutes in various fields, and various experiments from basic to applied experiments conducted in analytical laboratories and schools.

Devices

We use plastic materials to provide best quality and performance. Also, these products are available at low cost. We deliver laboratory equipment that is easy to use and meets market needs.

Pictogram referral

Pictogram for sales

	Individual item sales mark The items are sold in units of 1 piece.		Case sales mark The items are sold in case units.		Pack sales mark The items are sold in units of packs.
	Sample mark Sample items are available.		Small box sales mark The items are sold in units of small boxes.		No return mark Due to the nature of the product, this product cannot be returned.

Quality pictogram

	No inner cap mark No inner cap. This specification eliminates the need to attach an inner cap.		Packing mark Packing specifications are in place.		Material mark Material of each product is shown.
	Autoclavable mark This product is autoclavable.		Operating temperature range mark Indicates the operating temperature range of each product.		

When using this catalog

- Plastic products have different chemical resistance depending on the material, and may leak or deform depending on operating conditions such as density and temperature. Be sure to use the product after verifying it in a practical experiment using a sample product. (Refer to the list of chemical resistance performances of various materials at the end of this document.)
- When using our products in large quantities or in special environments such as high or low temperatures, be sure to consult us in advance or conduct a quality test on a sample product.
- We are constantly striving to improve our products. Therefore, please note that the product specifications may be changed or the product may be discontinued without prior notice.
- Prices shown in this catalog do not include consumption tax. Separate charges will apply.
- Prices of listed products are as of November 2021. Please note that the prices are subject to change due to price fluctuations, product improvements, and other circumstances.

CO₂ Reduction

In the long run, climate change, typically global warming, is an important issue to be addressed on a global scale.

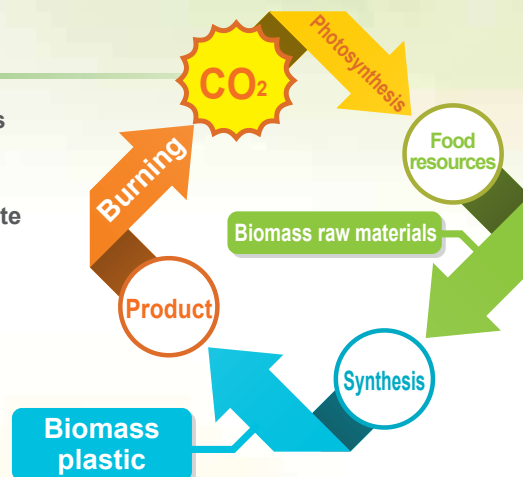

The carbon-neutral nature of biomass means that it does not increase the concentration of CO₂ in the atmosphere, thereby contributing to the prevention of global warming and the reduction of dependence on fossil resources.

Biomass plastic

This plastic is made from plant-derived raw materials manufactured from sugar cane instead of petroleum resources.

Although carbon dioxide is also produced when waste is burned, plants absorb carbon dioxide through photosynthesis, thereby reducing carbon dioxide emissions. (Carbon neutral)

When manufactured from 100% biomass plastic, CO₂ emissions can be reduced by approximately 70%.

Biodegradable plastics can also be manufactured

Low cost, 100% biodegradable, leaves no microplastics

Just adding 1% to 3% to conventional petroleum-derived raw materials can turn it into biodegradable plastic. Depending on the amount added and the product, it will decompose to CH₄ and CO₂ within 6 months to 3 years after land reclamation. It is effective for biodegradation in oxygen-free environments such as reclaimed lands and seabeds, and is designed to be triggered by anaerobic conditions to initiate decomposition and it is safe because it does not leave behind microplastics like conventional oxidizing additives.

NEW

Biomass bottle

Biomass N Bottle plus+

Bio-plastic bottles are standardized in consideration of global warming.
This product can contribute to eco-friendly carbon neutrality.

Clean Bottle

Product Number	Model No.	Capacity	Pack quantity (piece/pack)	Quantity (piece/case)
4-5190-01	BNW-100-25%	100mL	10	200
4-5190-02	BNW-250-25%	250mL	25	200
4-5190-03	BNW-500-25%	500mL	50	100
4-5190-04	BNW-1000-25%	1L	100	50

※The cleaning bottle is non-returnable.

Features

- It has the same performance as conventional petroleum-derived products.
- This product is made from biomass polyethylene that reduces CO₂ emissions by 70%. Only biomass polyethylene is added to the cap.
- It is not a biodegradable plastic, so it does not decompose naturally.

Size Table

Fluorine gas coating

Body HDPE Body Cap PP Packing TPE Inner cap LLDPE 0~70℃

By contacting the resin container with fluorine gas and scientifically altering the surface, we were able to add new functionality without changing the original physical properties. Since it is not a laminated coating, there is no peeling off and the effect lasts for a very long time.

*Sales unit is 1 piece.

*The above products are only available as bottles.

Features

- Prevention of deformation of containers (swelling and depression)
- Prevention of container deterioration
- Improvement of chemical resistance
- Prevention of odor leakage and label peeling
- Substitution of fluorine containers (low cost)
- Replacement of glass container (prevention of cracking)

Specifications

- Material: Body/Polypropylene (PP)(3-7327-01-05), High Density Polypropylene (HDPE) Cap/Polypropylene (PP), High Density Polypropylene (HDPE) (3-7329-01 and 02 Only)
- Packing/TPE(3-7328-01-06, 3-8294-01-05)
- Inner Cap/Linear polyethylene (LLDPE)

Precautions during use

- Please rinse several times before use (lukewarm water or cleaning solution).
- It is coated with fluorine, but the basic material is PE or PP, so please avoid using it at high temperature.
- Please handle it so that it does not damage the container when rinsing.
- Do not expose to open flame.

*Please refer to P.14, 15 and 23 for details about the container.

*Fluorine gas treatment is possible for containers other than the above products. Please contact us.

Washing bottle

- Double clean pack products with advanced cleaning technology
- Purified water washing in Class 100 and 1000 cleanrooms
- Vacuum-packed delivery

Achieve maximum surface cleanliness essential for high-precision industries!!

This surface contamination control system is essential for high-precision industries as a post-process in dissolving foreign matter with solvents. We use ultra-pure water with an upper limit of 18.3 MΩ (theoretical resistivity) → lower limit of 16.0 MΩ in combination with a charge neutralizer to control the cleaning of sub-micron size particles and to contribute to stable production in high-precision industries through surface cleaning technology close to extreme limits.

※Dimensions have tolerances.

Specifications

- Body/HDPE, Cap/Polypropylene (PP)
- Packing/Polyethylene (PE), Nozzle/Polyethylene (LDPE)
- No scale
- Operating temperature range: 0 to 70°C

Features

- This time we have added 2L, 5L and nozzle.
- Easy to check the opening and ideal as a product container.
- It can be crushed easily. (Reduction of disposal costs)
- It is designed to be easy to inject because the handle part is inclined.
- ※Nozzles are optional. (Not included with container)
- ※By using the nozzle, you can transfer smoothly.
- ※If you purchase only the nozzle, you will need to pay shipping fee.

Mouth structure

Cap
Packing on the top prevents leakage.Seal band
Unsealing can be confirmed by breaking the sealing band at the time of use.

It has a seal band that can tell at a glance if the cap has been opened.

Sealed bottle (TEA) <2L added.>

No inner cap Body HDPE Cap PP Inner cap LDPE Operating temperature range 0°C to 70°C

500mL

250mL

100mL

1L

Features

- The cap has an inner plug and can be used as an inner plugless container.
- Safety design without torque back during transportation and without leakage of contents.
- It is easy to purchase as it comes with the body and cap.
- Since there is no scale on the body, it is ideal as a product container.
- 5 items from 100 ml to 2000 ml can be used for the common cap.

Mouth structure

Two-piece structure
The cap is made of two pieces, an inner stopper and a cap, and can be used without coming off normally.Seal band
Unsealing can be confirmed by breaking the sealing band at the time of use.

Specifications

- Body/High Density Polyethylene (HDPE), Cap/Polypropylene (PP), Integrated Inner Plug/Linear Polyethylene (LLDPE)
- Operating temperature range: 0 to 70°C
- No scale (only 2L has scale)

Functional Containers

- ECO PLASTIC
- Fluorine gas coating
- Clean bottle (Washing bottle)
- Sealed bottle

Containers

- Small container
- JP bottle
- J bottle
- Standard bottle
- NP bottle
- Sterile water sampling bottle
- Vial (PET screw)
- Vial (Push)
- Flat square can
- Bottle with cock
- Taper jar/tank
- Cock

- Square box
- Ointment container
- PP clear jar
- Techno bottle
- Large polycarbonate bottle
- Multi bottle
- Trigger bottle

Instruments

- Disposable beaker
- PE hand beaker
- Beaker (TPX/PP no handle)
- Beaker (TPX/PP with handle)
- Measuring cup (PC/PP)
- Beaker (Conical)
- Flask
- Cylinder
- Water tank
- Dropper
- Washing bottle
- Funnel
- Devices
- Desiccator
- Small vacuum pot

NEW

Ideal for storing small amount of samples and products.

Small PP Screw Cap Bottle

No inner cap PP Autoclavable Operating temperature range 0℃~121℃

Clean Bottle

Product Number	Model No.	Capacity	Pack quantity (piece/pack)	Quantity (piece/pack)

- Operating temperature range: 0 to 121℃

Washing bottle

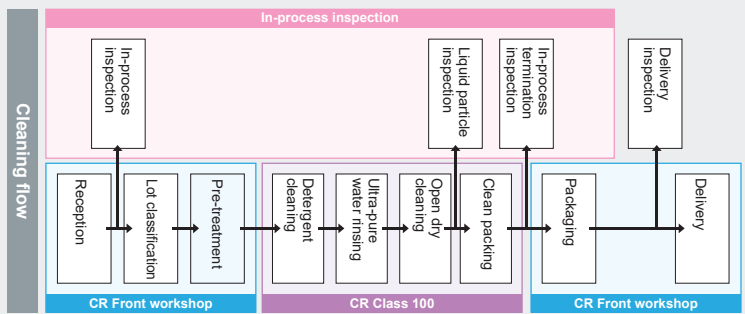

We offer precision cleaning services for a wide variety of products listed in our catalog.

How to Order

Achieves ultimate surface cleaning that is essential for high-precision industries!!

This surface contamination control system is indispensable for high-precision industries as a post-process in dissolving foreign matter with solvents. We use ultra-pure water with an upper limit of 18.3 MΩ (theoretical resistivity) → lower limit of 16.0 MΩ in combination with a charge neutralizer to control the cleaning of sub-micron size particles and to contribute to stable production in high-precision industries through surface cleaning technology close to extreme limits.

It is a transparent stretchable PP bottle that does not break easily.

JP Bottle

No inner cap Body Cap PP Operating temperature range 0℃~98℃

11-0206-55	JP-2000A	2L	200	36

※Sales unit is 1 piece. (Sterilized type is 1 case)

Features

- This is the world's first transparent stretching PP bottle.
- Since the mouth part is injection molded, there is no need for an inner plug, and it has been cleared for the vacuum leakage test.
- Stretch blow molding makes the arrangement of molecules constant and greatly increases strength and transparency.

Specifications

- Material: Body/Cap/Polypropylene (PP)
- Operating temperature range: 0 to 98℃
- Sterilized by EOG (ethylene oxide gas sterilization)

■ Cross section of the bottle mouth The inside of the mouth of the JP bottle is flat.

Washing bottle

We offer precision cleaning services for a wide variety of products listed in our catalog.

How to Order

Achieves ultimate surface cleaning that is essential for high-precision industries!!

This surface contamination control system is indispensable for high-precision industries as a post-process in dissolving foreign matter with solvents. We use ultra-pure water with an upper limit of 18.3 MΩ (theoretical resistivity) → lower limit of 16.0 MΩ in combination with a charge neutralizer to control the cleaning of sub-micron size particles and to contribute to stable production in high-precision industries through surface cleaning technology close to extreme limits.

Individual item sales mark
The items are sold in units of 1 piece.

Pack sales mark
The items are sold in units of packs.

Small box sales mark
The items are sold in units of small boxes.

Case sales mark
The items are sold in case units.

Sample mark
Sample items are available.

No return mark
Due to the nature of the product, this product cannot be returned.

Packing mark
Packing specifications are in place.

No inner cap mark
No inner cap: This specification eliminates the need to attach an inner cap.

PP Material mark
Material of each product is shown.

Autoclave mark
This product is autoclavable.

Operating temperature range mark
Indicates the operating temperature range of each product.

Union Container

Body LDPE + Nylon Cap HDPE Inner cap LDPE

Operating temperature range 0℃~70℃

Union Container (Clean type)				
Product Number	Item name	Specifications	Capacity	Quantity
2-3409-01	Clean type 5A	Single-Layer	5L	100
2-3409-02	Clean type 10A	Single-Layer	10L	
2-3409-21	Clean type 18A	Single-Layer	18L	50
2-3409-03	Clean type 20A	Single-Layer	20L	
2-3409-23	Clean type α5P	Multi-Layer	5L	100
2-3409-24	Clean type α10P	Multi-Layer	10L	
2-3409-25	Clean type α18P	Multi-Layer	18L	50
2-3409-26	Clean type α20P	Multi-Layer	20L	

- Features**
- Excellent chemical resistance, pinhole resistance, and drop strength.
 - Excellent heat resistance, suitable for various foods.
 - Leak test (liquid leakage test) is carried out for all items.
 - Multilayers have excellent gas barrier properties.

Union Container Clean Exterior Case		
Product Number	Item name	Quantity
2-3409-04	Clean type 5L Case	10
2-3409-05	Clean type 10L Case	
2-3409-22	Clean type 18L Case

4-2729-06	Square α10B	High barrier	10L	
4-2729-07	Square α18B	High barrier	18L	50
4-2729-08	Square α20B	High barrier	20L	

- Features**
- Use the seal on the top for carrying.
 - Like clean, there is almost no residual liquid.
 - Space saving (when not in use) and reduction of displacement (volume and weight).
 - Printing on film (containers) and use of color film are also possible.

Union Container Square Exterior Case		
Product Number	Item name	Quantity
4-2729-11	Square 5L Case	10

Features

- Excellent impact resistance, hard to break even if dropped when full of water
- The wide mouth makes cleaning and loading and unloading of contents easy.
- Due to the low permeability of carbon dioxide gas and oxygen gas, it is possible to store a large volume of medium (vaccines).
- It is suitable for food storage and transportation of fry and eggs related to marine products.

PFA Bottle

Specifications

- Teflon super PFA bottle
- For storage of high-purity reagent or ultrapure water.
- For long-term storage owing to little secular change.

PFA Bottle (Narrow Mouth)

Product Number	Capacity	Mouth inner diameter x cap outer diameter x body diameter x total height (mm)
4-5342-01	100mL	φ13.95×φ30×φ46.3×96.5
4-5342-02	250mL	φ14×φ30×φ59.7×133
4-5342-03	500mL	φ22.4×φ40×φ77×158
4-5342-04	1L	φ21.35×φ40×φ93.4×204

PFA Bottle (Wide Mouth)

Product Number	Capacity	Mouth inner diameter x cap outer diameter x body diameter x total height (mm)
4-5342-09	50mL	φ27×φ40×φ46.3×70.5
4-5342-05	100mL	φ28×φ40×φ46.2×97
4-5342-06	250mL	φ35.1×φ50×φ59.8×135.5
4-5342-07	500mL	φ44.15×φ60×φ77.5×158
4-5342-08	1L	φ43.8×φ60×φ94×203

Features

- Both the body and cap are made of high-purity Teflon with less ion elution than before, making them suitable for storing and storing high-purity chemicals and highly corrosive chemicals.
- Surface smoothness is high, allowing less penetration and absorption of chemicals and less gas permeation.
- Excellent transparency and heat resistance (Max 210°C). It comes with a scale.

PFA Bottle (With Inside Plug)

Features

- It has an inner stopper.
- It has excellent corrosion resistance and is translucent, so you can check the chemical solution inside and the sample.
- There is little change over time.

PFA Bottle (Narrow Mouth)

Product Number	Capacity	Body Diameter x Total Height (mm)
1-2305-01	50mL	φ49 x 72

Features

- ❖ No packing (no inner plug), but does not drain.
- ❖ This saves you time and labor by eliminating the tedious process of removing the inner plug.
- ❖ Autoclave (steam sterilization) is possible.
- * The liquid may penetrate through the mouth, so please check beforehand.

Specifications

- ❖ Material: Body, Lid/PP (polypropylene)
- ❖ Water leakage test passed
- ❖ Allowable temperature limit: 130°C
- ❖ With scale
- ❖ Steam sterilization temperature: 121°C

Disposable beakers with molded scale suitable for testing and mixing of various samples.

PP Disposable Beaker

PP 0℃~100℃

Features

- When filled with solution, the beaker becomes transparent and can be checked with the naked eye.
- Since the bottom is completely flat, stirring with a magnetic stirrer is possible.

Specifications

- Material: Polypropylene (PP)
- Operating temperature range: 0 to 100℃
- Molding method: 20mL・50mL・150mL・2L/Extrusion blow molding, Others /Vacuum molding

PE products can be used for various applications.

PE beaker with handle

HDPE -40℃~80℃

Features

- Robust type that can be used for a wide range of applications from research and experiments to general industrial use.
- The handle and container are integrally molded to prevent detachment. (Welded only for 10L)
- The easy-to-grip, well-balanced handle allows for easy tilt operation during extraction.
- The 10L type has two handles.
- The stable bottom allows for stirring with a magnetic stirrer.

- Operating temperature range: -40 to 80℃

A=Top outer diameter
B=Upper body diameter
C=Bottom body diameter
D=Overall height

The glass-like transparency and raised molded scale facilitate weighing.

TPX® Beaker

TPX® Autoclavable 20℃~150℃

Features

- The stable bottom allows for stirring with a magnetic stirrer.
- Heat resistant up to 170℃. Can be autoclaved and sterilized.
- ※However, product shrinkage may occur depending on the heating temperature.

Specifications

- Material: Methylbenzene resin (TPX®)
- Operating temperature range: 20 to 150℃
- Autoclavable

Transparent to the touch, allowing the naked eye to see the contents.

PP Beaker

PP Autoclavable 0℃~121℃

Features

- The stable bottom allows for stirring with a magnetic stirrer.
- Excellent chemical resistance and can be widely used for research and experiments.
- The spout is easy to drain and does not drip.
- Can be sterilized by autoclaving.
- ※However, product shrinkage may occur depending on the heating temperature.

Specifications

- Material: Polypropylene (PP)
- Operating temperature range: 0 to 121℃
- Autoclavable

Individual item sales mark
The items are sold in units of 1 piece.

Pack sales mark
The items are sold in units of packs.

Small box sales mark
The items are sold in units of small boxes.

Case sales mark
The items are sold in case units.

Sample mark
Sample items are available.

No return mark
Due to the nature of the product, this product cannot be returned.

Packing mark
Packing specifications are in place.

No inner cap mark
No inner cap. This specification eliminates the need to attach an inner cap.

Material mark
Material of each product is shown.

Autoclave mark
This product is autoclavable.

Operating temperature range mark
Indicates the operating temperature range of each product.

TPX® Beaker with Handle

TPX® Autoclavable 20~150℃

Features

- ✦ The glass-like transparency and raised molded scale facilitate weighing.
- ✦ The easy-to-grip, well-balanced handle allows for easy tilt operation during extraction.
- ✦ Heat resistant up to 170℃. Can be autoclaved and sterilized.
※However, product shrinkage may occur depending on the heating temperature.

Specifications

- ✦ Material: Methylbenzene resin (TPX®)
- ✦ Operating temperature range: 20 to 150℃
- ✦ Autoclavable

Individual item delivery

Easy-to-use shape with excellent chemical resistance.

PP Beaker with Handle

Body PP Autoclavable 0~121℃

Features

- ✦ Beaker can be used for a wide range of applications.
- ✦ The handle does not come off due to one-piece molding.
- ✦ Excellent chemical resistance.

※Dimensions have tolerances.

Specifications

- ✦ Material: Polypropylene (PP)
- ✦ Operating temperature range: 0 to 121℃
- ✦ Autoclavable

Individual item delivery

It is self-extinguishing (extinguishes when fire is kept away) and can be used for a wide range of applications from household to industrial use.

PC Measuring Cup

PC Autoclavable 80~120℃

Features

- ✦ Excellent transparency makes weighing easy.
- ✦ Strong with excellent impact resistance.
- ✦ Can be refrigerated, autoclaved or microwaved.
- ✦ The stable bottom allows for stirring with a magnetic stirrer.

Small vacuum
pot

Easy Dropper

LDPE
Operating temperature range
-30℃~60℃

Product Number	Model No.	Capacity	Overall length (mm)	Quantity
3-373-01	ES-1	1mL	100	500 (100 pieces × 5)
3-373-02	ES-2	2mL	115	500 (100 pieces × 5)

Quantity per carton	
ES-1	ES-2
2,000 pieces	

Features

- ✦ Economical dropper.
- ✦ Sterilized by gamma ray.

Specifications

- ✦ Low-density polyethylene (LDPE)
- ✦ Operating temperature range: -30 to 60℃

Chemical Dropper

LDPE
Operating temperature range
-30℃~60℃

Product Number	Capacity	Diameter × overall length (mm)	Approximate scale (mL)	Quantity
5-5652-01	1mL	φ20×190	0.5	1 bag (10 pieces)
5-5652-02	2mL	φ23×250		
5-5652-03	3mL	φ24×260	1	1 bag (3 pieces)
5-5652-04	5mL	φ28×270		
5-5652-05	10mL	φ33×280		
5-5652-06	20mL	φ38×390		
5-5652-07	50mL	φ56×530	2	1 bag (2 pieces)

※Dimensions have tolerances. ※Sales unit is 1 bag

Quantity per carton						
1mL	2mL	3mL	5mL	10mL	20mL	50mL
1,000 pieces	700 pieces	600 pieces	400 pieces	300 pieces	120 pieces	90 pieces

Specifications

- ✦ Material: Low-density polyethylene (LDPE)
- ✦ Operating temperature range: -30 to 60℃

Disposable Dropper

LDPE
Operating temperature range
-30℃~60℃

Product Number	Model No.	Approximate scale (mL)	Quantity
30-4101-55	DP-1	170	1 bag (100 pieces)
30-4102-55	DP-2	154	
30-4103-55	DP-3	150	

※Dimensions have tolerances. ※Sales unit is 1 bag

Quantity per carton		
DP-1	DP-2	DP-3
2,000 pieces		

Features

- ✦ Simple pipette with excellent chemical resistance and high transparency.
- ✦ The tip can be easily sealed with a flame or a hot iron.
- ✦ Equipped with scale

Specifications

- ✦ Material: Low-density polyethylene (LDPE)
- ✦ Capacity: DP-1: 2.5mL, DP-2: 2.7mL, DP-3: 2.5mL
- ✦ Operating temperature range: -30 to 60℃

Plastic Universal Dropper

LDPE
Operating temperature range
-30℃~60℃

Product Number	Capacity	Diameter × overall length (mm)	Approximate scale (mL)	Quantity
30-4202-55	1mL	φ13×105	0.15	1 bag (100 pieces)
30-4201-55	3mL	φ16×115	0.50	

※Dimensions have tolerances. ※Sales unit is 1 bag

Quantity per carton	
1mL	3mL
3,000 pieces	2,000 pieces

Features

- ✦ Flexible LDPE dropper with molded scale.

Specifications

- ✦ Material: Low-density polyethylene (LDPE)
- ✦ Operating temperature range: -30 to 60℃

J Washing Bottle

Body LDPE
Pipe LDPE
Cap LDPE
Operating temperature range
-30℃~60℃

Product Number	Capacity	Body diameter × bottle height/overall height (mm)	Approximate scale	Quantity
30-2204-55	100mL	φ48.0×103.0/173.0	10mL	1 box (12 units)
30-2203-55	250mL	φ60.0×136.5/206.5	25mL	
30-2202-55	500mL	φ73.0×172.0/242.0	50mL	1 box (6 units)
30-2201-55	1L	φ85.0×243.0/313.0		
30-2314-55	Nozzle for 100 mL	—	—	—
30-2313-55	Nozzle for 250 mL			
30-2312-55	Nozzle for 500 mL			
30-2311-55	Nozzle for 1 L			

※Dimensions have tolerances. ※Sales unit is 1 piece. ※The bend angle and overall height of the nozzle may vary due to hand processing.

Quantity per case			
100mL	250mL	500mL	1L
120 pieces		60 pieces	

Features

- ✦ Molded scale on the circumference of the bottle allows the contents to be measured at any position.
- ✦ The mouth of the bottle is large, making it easy to inject distilled water and chemicals.

Specifications

- ✦ Material: Body, Pipe/Low-density polyethylene (LDPE)
Cap/Linear polyethylene (LLDPE)
- ✦ Operating temperature range: -30 to 60℃
- ✦ Mouth inner diameter: φ32.0mm

Poly Funnel (PE, Joint Type)

HDPE
Operating temperature range
-30℃~70℃

Features

- ✦ Standard liquid filtration funnel with excellent chemical resistance.
- ✦ A wide variety of sizes are available, with 11 types ranging from φ30 to φ300.
- ✦ The φ210, 240, and 300 have removable feet.
- ✦ (The 30A pipe threads allow for installation of ball valves.)

Specifications

- ✦ Material: High-density polyethylene (HDPE)
- ✦ Operating temperature range: -30 to 70℃

Product Number	Item name	Top outer diameter (mm)	Minimum outer diameter of foot (mm)	Maximum outer diameter of foot (mm)	Foot height (mm)	Overall height (mm)	Outer diameter of joint part (mm)

POLYCARBONATE DESICCATORS
Polycarbo Desiccator

Packing Body PC 0 to 55°C

Features

- The lid, body, and shelves are all made of PC, which is less susceptible to breakage and more durable than glass. (Ratio of glass weight is about 1/3)
- The joint between the lid and body is non-vaseline and maintenance free.
- Vacuuming is possible up to 1 Torr.

Specifications

- Material: Body/Polycarbonate (PC), O-ring/NBR
- Operating temperature range: 0 to 55°C (assuming reduced pressure use)
- Needle valve 1/8 attached (RD-240V/300V only)

Polycarbo Desiccator

Product Number	Model No.	Tray diameter (ø mm)
20-7001-55	RD-240	235

COMPACT VACUUM DESICCATORS
Small Vacuum Pot

Packing Clasp PP Body PC 0 to 55°C

Features

- Durable, unbreakable and light-weight product.
- Vacuuming is possible up to 1 Torr.
- It is small and convenient for carrying.
- Vacuuming can be easily performed without taking up much space.

Specifications

- Specification Material: Body/Polycarbonate (PC), O-ring/silicone, clasp/polypropylene (PP)
- Operating temperature range: 0 to 55°C (assuming reduced pressure use)

※Drilling is required for installation.
※Instruction manual can be obtained from our website.

Small Vacuum Pot

Product Number	Model No.	Specifications
2-5090-01	MVP-100H	No valve
2-5090-03	MVP-100HV	With valve
2-5090-05	MVP-100HV with Vacuum Gauge attachment (top)	With valve and vacuum gauge
2-5090-02	MVP-100M	No valve

How to Order

Individual item sales mark
The items are sold in units of 1 piece.

Pack sales mark
The items are sold in units of packs.

Small box sales mark
The items are sold in units of small boxes.

Case sales mark
The items are sold in case units.

Sample mark
Sample items are available.

No return mark
Due to the nature of the product, this product cannot be returned.

Packing mark
Packing specifications are in place.

No inner cap
No inner cap. This specification eliminates the need to attach an inner cap.

PP Material mark
Material of each product is shown.

Autoclave mark
This product is autoclavable.

Operating temperature range mark
Indicates the operating temperature range of each product.

Outline of Molding Method

Injection Molding

■ Features

- Best suited for large-scale production (not recommended for small-scale)
- Die-making cost: High-price option
- Dimensional accuracy: Precision
- Product's radial thickness adjustment: Mold design changes required
- Designability: High

■ Our Products

- Graduated cylinder
- Beaker
- Cap
- Inner cap

Extrusion Blow Molding

■ Features

- Large-scale production: Best suited (Not recommended for small-scale)
- Die-making cost: Relatively low-cost option
- Dimensional accuracy: Lacks precision
- Product's radial thickness adjustment: Possible
- Designability: Low

■ Our Products

- J bottle
- TEA
- Standard bottle
- Flat square can
- Other

Stretch Blow Molding

■ Features

- Best suited for large-scale production (not recommended for small-scale)
- Die-making cost: High-price option
- Dimensional accuracy: Precision
- Product's radial thickness design: Mold design changes required
- Designability: Low

■ Our Products

- JP bottle
- PET screw vial
- NP bottle ※ 100, 250 mL

Vacuum Molding (Continuous)

■ Features

- Large-scale production: Best suited
- Die-making cost: High-price option
- Dimensional accuracy: Rough
- Product's radial thickness adjustment: Possible
- Designability: Low
